Safety Rules For Online Dating

5 There are many stories out there about the perils of online dating. Some are urban legends, and some are alarmist or driven by contempt. Others ring true because we hear them from friends or read about them in the newspaper. The truth of the matter is that yes, there are creeps out there who prey on people

“If you have any reason to feel uncomfortable or unsafe, leave.”

10 that reveal personal information on the internet. It is also true that there are basic precautions you can take to keep them at bay. Follow these strategies to date online safely:

Stay anonymous

15 This is basic, but it is easy to let things slip in your initial excitement when someone contacts you. First, only use dating services that do not disclose personal information. Second, don't reveal identifying information about your neighborhood, apartment building, or workplace. Third, if you have children, do not name them or their school.

Meet in a public place

20 It is not a good idea to go hiking on a secluded trail or rafting down a river on the first date. Instead, meet at a restaurant, coffee shop, or mall some distance away from your home. Carry your cell phone and keep it on at all times. At your meeting, if you have any reason to feel uncomfortable or unsafe, leave.

Go with your instincts

25 Usually, everything checks out and the person you meet is normal. If your gut tells you otherwise, trust your intuitive judgment.
